

## Why Partner with our Program?

The infrastructural and economic growth in Africa will only become praiseworthy when her young talents are exercised in tech innovations with her abundant and enviable resources.

Whatever is not valued will ultimately either be lost or stolen, hence successful conversion of Africa's abundant resources to global valued products will only come as we support that which is our own and ultimately invest in our future.

### Our Roles:

Since January 2018, Luz de Calcio Center for Support of African Innovations (LUCSAI) programs seek to discover, nurture and showcase exceptional technological innovations and inventions from young and talented Africans.

#### Discover

- Online and real time talents hunt of young tech talents from every part of Africa.
- Engaging the cooperation of educators and tech professionals on discovery of such talents and grooming of the same.
- Our specialized programs such as "Tech Innovation Challenge", "Tech Exhibition Show" and Inventors' Party exceptionally celebrate upcoming talents in tech innovations.

#### Nurture

- Establishment of a legal forum and online networking platform for all young talents for the purpose of knowledge sharing.
- Organising workshops and seminars with industry experts for both mentoring and motivational needs.
- Creating necessary environment for legal protection and in support of all developed tech projects of our discovered talents.

#### Showcase

- Annual physical exhibitions of discovered tech products with stakeholders to attract supports outside
- Continuous online media broadcast of all discovered tech products.
- Partnership with interested local and international organisations for mutual support and for exchange of tech discoveries video programs.

#### Our Vision

"Awakening and unveiling inherent potentials of young Africans in technological inventions and innovations towards Africans' socio-economic advantage."

#### Our Mission

"To source for promising, young and talented Africans with outstanding technological inventions and innovations, and giving them platform to come to limelight."

## Our Needs:

- Partnership with industries, establishments and educators in creating awareness and motivations for young and promising tech talents in various institutions of learning.
- Partnership with establishments of like minds whose through marketing their products will help drive home our vision to these African young tech learners in various institutions.
- Media sponsor of our programs which includes different publications, media talk and coverage of our annual tech exhibition shows.
- Space and other essential provisions that will cater for young tech learners for occasional seminars, workshop and exhibition show programs .
- Partnership in bringing of viable tech innovations of young talents to standard and providing aids for intern programs with key institutions and industries.

- Salvaging local talents from being lost to develop countries due to inadequate support from governments in African countries.
- Creating skill development and self-employment opportunities for the youth in tech sector.
- Building a viable market of African tech talents as human resource hub for both local and international industrial development.
- Solving African problems through African developed tech solutions.
